# Security At Your Finger Tip

**Inter Flat Communication:**
Flat owner can communicate with any other Flat owner by just dialing the respective flat number (extension number).

**Talking Caller ID*:**
This feature helps you to get callers identification through voice.

**Wake Up Alarm:**
Each extension can have their own morning alarm.

**All Party Conference:**
Unlimited extensions can be on conference at a time.

**Cable Tamper Alert*:**
Whenever your flat extension cable is tampered knowingly or unknowingly by a thief, immediately display will show your flat number with siren at the security.

**Electronic Door Sensor Interface*:**
If your flat is fitted with a door sensor, it will alarm when any unauthorized entry takes place.

**President Broadcasting*:**
Any message can be stored in the system, which will be announced to every extension as soon as extension goes off hook.

**Vendor Alarm*:**
This facility informs you the arrival / availability of vendor.

**Digital Real Time Clock at the Security / Lobby :**
Display installed at the security will indicate extension number of the calling party as well as real time clock, when extension is free.

**Paging Port *:**
With the help of this facility you can broadcast any live message or you can page a particular person from your flat.

**Caller ID Device Interfacing:**
Any standard telephone instrument having CLIP (DTMF type) or separate Caller ID equipment can be connected to the extension, This will display the extension number from where you are getting the call.

**Panic Alert Button*:**
In case of extreme emergency you can press the panic button by which siren will buzz at the security with flat number on the display board.

**Gas Leak Detector*:**
If your flat is fitted with gas leak detector then in case of any leakage of LPG(cylinder) or CNG(piped) gas it buzzes a alarm in the flat as well as at the security with your flat number flashing on the display.
